

Fencing Tools

Post Hole Borers

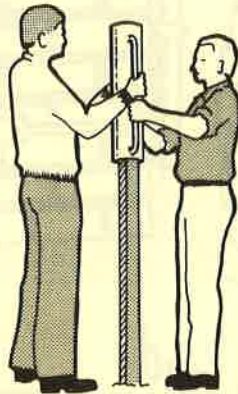

Mustang Post Hole Borers have no moving parts, nothing to go wrong. In normal soil they will bore a hole up to 2' deep — fast, and virtually no soil compacting is required. The handles are detachable so holes can be bored close up to an existing fence. Of rugged, all welded, heavy gauge steel construction, Mustang Post Hole Borers will give many years of trouble free service.

Four sizes: 3 inch; 5 inch; 6 inch and 9 inch diameter.

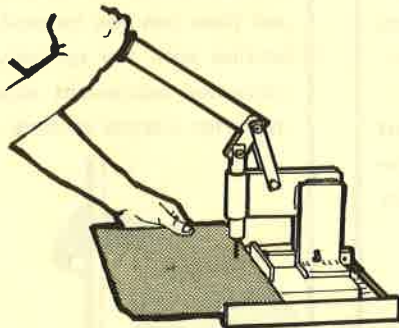

Post Driver

A robust all steel post driver for fencing posts up to 5 inches (125 mm) diameter. This complements our range of post hole borers. In certain soft sandy soils it is even quicker and more effective to use the post driver. The new post driver prevents damage to the post caused by miss-hits and lessens the risk of injury to the operators.

The overall length is 25 inches and it weighs 38lb. (17.24kg).

Heavy Duty Slate Hole Punch

A purpose built tool designed to punch countersunk holes repetitively in all natural and man made slates up to 9 mm (3/8ths ins) thick. An adjustable side stop is fitted as standard.

It is of robust all steel construction to stand up to the toughest site conditions. The hardened steel punch can be removed easily for regrinding.

HEAD LAP GUIDE

This optional extra enables the operator to determine the exact position of each hole relative to the end as well as the side of each slate.

Lifting Tools

Adjustable End Gripper

Enables two persons to carry kerbstones and both 2 ft and 3 ft paving slabs and place accurately in position. Conversion from one size to the other takes only a minute.

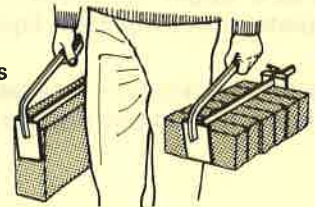

Side Gripper

Enables two persons to carry kerbstones safely and position accurately. The heavier the kerbstones the tighter the grip.

Adjustable Brick Lifter

One person carrying two lifters can carry 20 bricks or two 450mm blocks or a combination of both. Adjustments take seconds only.

Should you require a particular tool not shown in this brochure, please ask as we may be able to satisfy your requirements.
